To obtain a position where I can utilize my skills in Full Stack Development and contribute effectively as a Software Professional to Organization's success.

EXECUTIVE SUMMARY

- **4+ years of experience** as a Senior Software Engineer specializing in full-stack development.
- Proficient in analyzing requirements, architecting scalable solutions, and collaborating across cross-functional teams.
- Strong problem-solver with a track record of tackling complex challenges throughout project lifecycles.
- Skilled in **Java, JavaScript, Python, React, Spring Boot, Flask, PostgreSQL, and building robust REST APIs.**
- Active **open-source contributor**; solved over **2000 DSA problems** across multiple platforms.
- Experienced in **Agile (Scrum) methodologies**, utilizing Git, JIRA, and Bitbucket for efficient sprint-based development.

TECHNICAL SKILLS

- **Programming Languages:** C++ / Java / JavaScript / Python / Data Structures.
- **Front End Development:** HTML / CSS / React / Bootstrap/ Tailwind CSS/ React-Router
- **Backend Development:** Spring boot / Flask / Hibernate / RESTful APIs
- **Databases:** MySQL, PostgreSQL.
- **DevOps / Atlassian Tools:** Git / Jira / Bitbucket / Vercel
- **SDLC Methodologies:** Scrum
- **Data Analysis / Visualization:** Numpy / Pandas / Matplotlib / Seaborn
- **Prompt Engineering:** ChatGPT, GitHub Copilot, DeepSeek

PROFESSIONAL EXPERIENCE

- Working as Senior Software Engineer for **USEReady Technologies Pvt Ltd** (<https://www.useready.com/>) since November 2021

CAREER CONTOUR

Project 1: Pixel Perfect (2021–Current) – Full-Time @ USEReady

Pixel Perfect is a **high-precision reporting solution** built within Tableau dashboards, enabling the generation of print-ready, well-formatted, and audit-compliant reports. The product caters for industries like **BFSI**, where data accuracy and design consistency are critical.

Clients: BPI, FIS, CITI, Morgan Stanley, DCSS

Key Contributions:

- Spearheaded the **product migration** from GA to FIS's codebase, ensuring seamless integration and delivery.
- Took full **ownership of MVP development** for BPI and DCSS delivering all frontend functionalities.
- Contributed to a **UI revamp** for the GA product, enhancing design consistency and user experience.
- **Mentored 8 interns and juniors**, helping them ramp up and contribute to the codebase.

- Developed and owned key features:
 - Advanced sorting and search algorithms
 - Multiple SFTP file transfer mechanisms
 - Lazy loading implementation for performance on large datasets
- Complete **end-to-end ownership** of features — covering frontend, backend, and database changes.

GitHub: *Private, company project*

Tech Stack: HTML, CSS, JavaScript, React, Bootstrap, Java, Spring Boot, Hibernate, PostgreSQL, Tableau

Project 2 : Expensify (2025-Current) – Personal Project

Expensify is a **personal finance tracker** built for individuals struggling with money management. The goal is to provide a **simple yet powerful interface** for expense and income tracking, with automation and seamless usability.

Key Contributions:

- Developed full-stack architecture for the application.
- Implemented core features:
 - Expense/Income tracking Integrated email reporting and local Excel export using **Pandas**.
 - **Visual representations** of the expense and income data using **react-charts**.
 - Login, signup, change, and forgot password flows.

Tech Stack: JavaScript, React, CSS, Tailwind CSS, Bootstrap, React-Router, React-Charts, Java, Spring Boot, Hibernate, Flask, Pandas, PostgreSQL

Project 3: DailyScribe (2025) – Personal Project

The **DailyScribe** Journaling Application is a personal productivity tool that helps users record, reflect, and track their thoughts over time. Designed for both emotional well-being and daily habit-building, the app is responsive, user-friendly, and optimized for performance. It also demonstrates frontend and backend integration.

Key Contributions:

- Built a **clean, intuitive UI** for writing and managing daily journal entries.
- Enabled features like entry **search, edit, delete**, and emotion-based filtering.
- Implemented user authentication with proper login flows.
- Implemented PDF integration for the backup and with a layer encryption for personal data safety.

Tech Stack: JavaScript, React, CSS, Bootstrap, React-Router, Java, Spring boot, Hibernate, PostgreSQL.

ACHIEVEMENTS

- Promoted to **Senior Software Engineer in April 2024**
 - Spot Awards for **Best Performer** in USEReady
 - **5-star gold badge in problem- solving & Python**, and **4-star silver badges in C++, SQL, Java & JavaScript** on HackerRank.
 - Solved over **550 problems** on GeeksForGeeks, with a coding score over 1200.
 - Solved over **670 problems** on LeetCode and received **365 Days of coding Badge in 2025, 200 Days Badge in 2025, 100 Days Badge in 2022 & 2025, 50 Days Badge in 2024 & 2025.**
 - Contributing to **open-source by building and maintaining full-stack projects** grounds up, focusing on real-world problem solving and scalability.
-

ACADEMIC CREDENTIALS

- **B.Tech** in Computer Science & Engineering from Lovely Professional University (LPU), Jalandhar, in 2021
- **H.S.C** (Science/Maths) from Gurugram Public School, Gurgaon, in 2017
