To obtain a position where I can utilize my skills in Full Stack Development and contribute effectively as a Software Professional to Organization's success.

EXECUTIVE SUMMARY

- **3.5 years of experience** as a Senior Software Engineer specializing in full-stack web development.
- Proficient in analyzing requirements, architecting scalable solutions, and collaborating across cross-functional teams.
- Strong problem-solver with a track record of tackling complex challenges throughout project lifecycles.
- Skilled in **Java, JavaScript, Python, React, Spring Boot, Flask, PostgreSQL, and building robust REST APIs**.
- Active **open-source contributor** ; solved over **1500 DSA problems** across multiple platforms.
- Experienced in **Agile (Scrum) methodologies**, utilizing Git, JIRA, and Bitbucket for efficient sprint-based development.

TECHNICAL SKILLS

- **Programming Languages:** C++ / Java / JavaScript / Python / Data Structures.
- **Front End Development:** HTML / CSS / React / Bootstrap/ Redux
- **Backend Development:** Spring boot / Flask / Hibernate / RESTful APIs
- **Databases:** MySQL, PostgreSQL.
- **DevOps / Atlassian Tools:** Git / Jira / Bitbucket / Vercel
- **SDLC Methodologies:** Scrum
- **Data Analysis / Visualization/ Machine Learning:** Numpy / Pandas / Matplotlib / Seaborn / Scikit-learn
- **Prompt Engineering:** ChatGPT, GitHub Copilot, DeepSeek

CAREER CONTOUR

Project 1: Pixel Perfect (2021–Current) – Full-Time @ USEReady

Description:

Pixel Perfect is a **high-precision reporting solution** built within Tableau dashboards, enabling the generation of print-ready, well-formatted, and audit-compliant reports. The product caters for industries like **BFSI**, where data accuracy and design consistency are critical.

Clients: BPI, FIS, CITI, Morgan Stanley, DCSS

Key Contributions:

- Spearheaded the **product migration** from GA to FIS's codebase, ensuring seamless integration and delivery.
- Took full **ownership of MVP development** for BPI and DCSS delivering all frontend functionalities.
- Contributed to a **UI revamp** for the GA product, enhancing design consistency and user experience.
- **Mentored 8 interns and juniors**, helping them ramp up and contribute to the codebase.
- Developed and owned key features:
 - Advanced sorting and search algorithms
 - Multiple SFTP file transfer mechanisms
 - Lazy loading implementation for performance on large datasets

- Complete **end-to-end ownership** of features — covering frontend, backend, and database changes.

GitHub: *Private, company project*

Tech Stack: HTML, CSS, JavaScript, React, Bootstrap, Java, Spring Boot, Hibernate, PostgreSQL, Tableau

Project 2: FlexBoard (2024–Current) – Personal Project

Description:

FlexBoard is a **productivity-enhancing SaaS application** that combines **task and project management** with automation to help solopreneurs and startups optimize their time. It includes **AI-powered features** (ChatGPT + ML) for smarter work planning and performance tracking.

Key Contributions:

- Designed and developed the complete **frontend and backend architecture**.
- Built modules for:
 - **Task Management**
 - **Project Management**
- Added **reward systems** also to keep the user hooked.
- Implemented **AI-based task classification** using Logistic Regression + NLP to auto-tag and prioritize tasks.
- Enabled **Excel-based import/export** with seamless parsing.
- Delivered **real-time UI enhancements** and performance improvements.

GitHub: [FlexBoard GitHub Repo](#)

Tech Stack: JavaScript, React, CSS, Bootstrap, Python, Flask, PostgreSQL, OpenPyXL, Numpy, Pandas, Psycopg2, scikit-learn, ChatGPT API

Project 3: Expensify (2024) – Personal Project

Description:

Expensify is a **personal finance tracker** built for individuals struggling with money management. The goal is to provide a **simple yet powerful interface** for expense and income tracking, with automation and seamless usability.

Key Contributions:

- Developed full-stack architecture for the application.
- Implemented core features:
 - **Recurring Expense/Income tracking**
 - **Integrated email reporting** and **local Excel export** using Apache POI
 - **Secure password handling** using Jasypt decryption
 - **Login, signup, change, and forgot password flows**
 - **Search and sort algorithms** to enhance data accessibility

- Optimized the UI/UX for ease of use.

GitHub: [Expensify GitHub Repo](#)

Tech Stack: JavaScript, React, CSS, Bootstrap, Java, Spring Boot, Hibernate, PostgreSQL, Apache POI (Excel export), Jasypt (Password decryption)

Project 4: Visual Resume (2025) – Personal Project

Description:

Visual Resume is a **modern digital resume** designed to stand out in the competitive job market. It's interactive, stylish, and shareable. The project serves as both a portfolio and a live demonstration of frontend capabilities. It's hosted publicly and shows **theme toggling, animations**, and more.

Key Contributions:

- Designed a **sleek UI with light/dark mode toggle** for better accessibility.
- Added **smooth animations and responsive layout** for visual appeal.
- Deployed the app using **Vercel** for quick, global access.
- Built interactive sections like About, DSA, Projects, Experience, and Contact Me.
- Added **resume download/view** functionality and GitHub integration.

GitHub: [Visual Resume GitHub Repo](#)

Tech Stack: JavaScript, React, CSS, Bootstrap, Vercel

ACHIEVEMENTS

- Promoted to **Senior Software Engineer in April 2024**
- Spot Award for **Best Performer in Nov 2022**.
- **5-star gold badge in problem-solving & Python**, and **4-star silver badges in C++, SQL, Java & JavaScript** on HackerRank.
- Solved over **500 problems** attaining **institute rank of 583 with a coding score of 1200** on GeeksForGeeks.
- Solved over **620 problems** on LeetCode and received the **100 Days Badge in 2022 and 50 Days Badge in 2024, 2025**.
- **Contributing to open-source by building and maintaining full-stack projects** from the ground up, focusing on real-world problem solving and scalability.

ACADEMIC CREDENTIALS

- **B.Tech** in Computer Science & Engineering from Lovely Professional University (LPU), Jalandhar in year 2021
 - **H.S.C** (Science/Maths) from Gurugram Public School, Gurgaon, in year 2017
-
