• Project-Info: <https://projectpediafe.vercel.app/>

---

Full Stack Developer with 4+ years of experience in React, Java, Spring Boot, PostgreSQL, and REST API development. Experienced in building scalable web applications, improving performance, and working in Agile environments.

---

## SUMMARY

- **4.5 years of experience** as a Senior Software Engineer specializing in full-stack development.
  - Proficient in analyzing requirements, architecting scalable solutions, and collaborating across cross-functional teams.
  - Strong problem-solver with a track record of tackling complex challenges throughout project lifecycles.
  - Skilled in **Java, JavaScript, Python, React, Spring Boot, Flask, PostgreSQL, and building robust REST APIs**.
  - Active **open-source contributor**; solved over **2000 DSA problems** across multiple platforms.
  - Experienced in **Agile (Scrum) methodologies**, utilizing Git, JIRA, and Bitbucket for efficient sprint-based development.
- 

## SKILLS

- **Programming Languages:** Java, JavaScript, Python, C++, Data Structures and Algorithms
  - **Front End Development:** React, HTML, CSS, Bootstrap, Tailwind CSS, Redux, React-Router
  - **Backend Development:** Spring Boot, Hibernate, Flask, REST APIs
  - **Databases:** PostgreSQL, MySQL
  - **DevOps / Atlassian Tools/ IDE(s):** Git, GitHub, Jira, Bitbucket, Vercel, VSCode, Eclipse, Antigravity
  - **SDLC Methodologies:** Scrum
  - **AI Prompt Engineering:** ChatGPT, GitHub Copilot, DeepSeek
- 

## EXPERIENCE

- Working as Senior Software Engineer for **USEReady Technologies Pvt Ltd** (<https://www.useready.com/>) since November 2021
- 

## PROJECTS

### Project 1: Pixel Perfect (2021–Current) – Full-Time @ USEReady

Pixel Perfect is a **high-precision reporting solution** built within Tableau dashboards, enabling the generation of print-ready, well-formatted, and audit-compliant reports. The product caters for industries like **BFSI**, where data accuracy and design consistency are critical. **Clients:** BPI, FIS, CITI, Morgan Stanley, DCSS

#### Key Contributions:

- Improved application performance by implementing **lazy loading and code-splitting**, reducing initial load time and enhancing user experience
- Designed and implemented **efficient search and sorting mechanisms** for large-scale datasets (optimized for speed and accuracy)
- Built and integrated **secure SFTP-based file transfer solutions**, ensuring reliable data exchange across systems
- Collaborated in an **Agile Scrum environment**, working closely with cross-functional teams using **Jira and Git** for efficient delivery. Mentored **8 junior developers**, conducted code reviews, improving overall team productivity

**GitHub:** *Private, company project*

**Tech Stack:** HTML, CSS, JavaScript, React, Bootstrap, Java, Spring Boot, Hibernate, PostgreSQL, Tableau

## Project 2 : Expensify (2025) – Personal Project

Expensify is a **personal finance tracker** built for individuals struggling with money management. The goal is to provide a **simple yet powerful interface** for expense and income tracking, with automation and seamless usability.

### Key Contributions:

- Built a full-stack expense tracking application using React, Spring Boot, and PostgreSQL
- Implemented authentication (login, signup, forgot password)
- Added data visualization using react-charts
- Integrated email reports and Excel export using Pandas
- Developed REST APIs for expense and income management

**GitHub:** [Expensify GitHub Repo](#) / **Project-Info:** <https://projectpediafe.vercel.app/fullStack/expensify>

**Tech Stack:** JavaScript, React, CSS, Tailwind CSS, Bootstrap, React-Router, React-Charts, Java, Spring Boot, Hibernate, Flask, Pandas, PostgreSQL

---

## Project 3: DailyScribe (2025) – Personal Project

The **DailyScribe** Journaling Application is a personal productivity tool that helps users record, reflect, and track their thoughts over time. Designed for both emotional well-being and personal effectiveness, the app is responsive, user-friendly, and optimized for performance. It also demonstrates frontend and backend integration.

### Key Contributions:

- Developed a journaling web application with features for creating, editing, deleting, and searching journal entries
- Implemented emotion-based filtering for better organization and analysis of personal entries
- Integrated secure authentication and user session management
- Added encrypted PDF export functionality for secure data backup and privacy protection.

**GitHub:** [DailyScribe GitHub Repo](#) / **Project-Info:** <https://projectpediafe.vercel.app/fullStack/dailyscribe>

**Tech Stack:** JavaScript, React, CSS, Bootstrap, React-Router, Java, Spring boot, Hibernate, PostgreSQL.

---

## ACHIEVEMENTS

- Promoted to **Senior Software Engineer in April 2024**
  - Spot Awards for **Best Performer** in USEReady
  - **5-star gold badge in problem- solving & Python**, and **4-star silver badges in C++, SQL, Java & JavaScript** on HackerRank.
  - Solved over **550 problems** on GeeksForGeeks, with a coding score over 1200.
  - Solved over **670 problems** on LeetCode and received **365 Days of coding Badge in 2025, 200 Days Badge in 2025, 100 Days Badge in 2022 & 2025, 50 Days Badge in 2024 & 2025.**
  - Contributing to **open-source by building and maintaining full-stack projects** grounds up, focusing on real-world problem solving and scalability.
- 

## EDUCATION

- **B.Tech** in Computer Science & Engineering from Lovely Professional University (LPU), Jalandhar, in 2021
- **H.S.C** (Science/Maths) from Gurugram Public School, Gurgaon, in 2017
